

Load Binder 8-10 mm, with Safety Latch

Art nr.199-0810

The hooks of the load binder are attached between the links on the short-linked chain to be tightened. With the help of the tensioner, the chain is pulled together so that the length is adjusted and keeps the chain tight. The chain tensioner is equipped with a safety pin according to the requirements in SS-EN12195-3.
